## KINETIC AND POTENTIAL ENERGY WORKSHEET

Determine whether the the objects in the following problems have
kinetic or potential energy.
Then choose the correct formula to use:
$E_{K}=1 / 2 \mathrm{mv}^{2} \quad$ OR $\quad E_{P}=W t . x h t$.

1. You serve a volleyball with a mass of 2.1 kg . The ball leaves your hand with a speed of $30 \mathrm{~m} / \mathrm{s}$. The ball has $\qquad$ energy. Calculate it.
2. A baby carriage is sitting at the top of a hill that is 21 m high. The carriage with the baby weighs 12 N . The carriage has $\qquad$ energy. Calculate it.
3. A car is traveling with a velocity of $40 \mathrm{~m} / \mathrm{s}$ and has a mass of 1120 kg . The car has
$\qquad$ energy. Calculate it.
4. A cinder block is sitting on a platform 20 m high. It weighs 79 N . The block has
$\qquad$ energy. Calculate it.
5. There is a bell at the top of a tower that is 45 m high. The bell weighs 190 N . The bell has $\qquad$ energy. Calculate it.
6. A roller coaster is at the top of a 72 m hill and weighs 966 N . The coaster (at this moment) has $\qquad$ energy. Calculate it.
